## Ajira Digital Program

## Description

### Cover your digital basics – Get Connected (Digital Literacy)

The digital world is upon us both personally and professionally. Having a better understanding of the Internet, computers and social media can be a big help toward acquiring digital skills. And, once you have these skills there are many more possibilities opened to you as far as career advancement. Learn how to use a computer, connect devices and access search, email, and social media. Enjoy course content that is very user-friendly and interactive with lots of illustrations! No previous knowledge is needed for this introductory course.

#### Course Overview

The Get Connected course provides an introduction to the digital world with networks as a foundation for connecting people and things. The curriculum helps students understand how to use computers and connect to the Internet. Get Connected also explores the human network and introduces students to the world of social media.

By the end of the course, students will be able to:

- Understand the basics of computers and communications using electronic and social media.
- Manage files and documents on a Windows-based computer.
- Navigate the Internet and use search engines and web mail.

The 30-hour curriculum may be used as a supplement to an existing course or as a short course. Students can self-enroll and take it at their own pace or, instructors can create an instructor-led course.

Please provide the mandatory information (First Name, Last Name and e-mail address) in the appropriate fields on the right, to create your free account and access the course.

A CAPTCHA grid titled "Select all squares with crosswalks". It contains 12 images of street scenes. The bottom-left image shows a sidewalk with a crack. The bottom-right image shows a car parked on the side of the road. The other 10 images show various street scenes, including several crosswalks. Four of the images with crosswalks have a blue checkmark icon in the bottom-left corner, indicating they are selected.

# Step 3.2 : Activate Account

- Check your email and click on the Get Started link to access your account.

15 Jun - 29 Oct 2020

Geofrey Otieno Kitoto, Instructor Alias

- Go to your email and click on the Activation link
- Login on Netacad

## Step 3.3 : Having trouble loggin in?

- Follow these four useful tips:
  1. **Check junk mail** - sadly some email providers may treat automated email as spam.
  2. **Check your browser settings** ... you may need to trust cookies (or possibly cross-site cookies) from NetAcad
  3. Do not be afraid to try a **different email account** - if the system isn't working, try another email account - often popular free email accounts work better.
  4. Maybe try a **different web browser**

# Step 4: The course will appear under “I'm Learning”
